CORRECTING PERFORMANCE PROBLEMS

This course introduces students to performance problems and how they affect an organization. Students learn how to determine the severity of a performance problem, identify causes, approach employees who have problems, and conduct effective feedback sessions. Through interactive exercises the class will learn how to explain the impact of problematic behavior and respond to negative and positive employee reactions. Course activities also cover conducting an effective disciplinary meeting and determining whether you have sufficient cause and evidence to discipline an employee, and preparing for disciplinary action. The class also will learn how to document and use information about an employee’s performance, and conduct a follow-up meeting with an employee.
