

PREPARATION FOR THE PfMP® EXAM

PFM00.99

No company has the resources to meet all of its business needs. This is true in the best of times. It certainly is even truer when times are tough. Portfolio management is a process to ensure that your company spends its scarce resources on the work that is of the most value to your company, and work that is most closely aligned to your business goals and strategies. Once selected, portfolio management ensures that the work is optimally staffed, governed and monitored by the management team.

Portfolio management is more critical than ever to ensure your projects achieve their desired business value. The Project Management Institute (PMI) has recognized this importance with a certification for portfolio managers – the PfMP®. This class helps students understand the content of the PMI Standard for Portfolio Management and prepare them to take and pass the PfMP® exam.

PREREQUISITES

- Portfolio management experience

LEARNING OBJECTIVES

At the end of this class, participants should be able to:
